

designinc

Web Portfolio

For the big, the small and everything in between, Design Inc build effective websites for businesses who want to get the most from their online marketing.

Design Inc is an award-winning UK-based digital creative agency providing our clients with modern, forward thinking websites and eCommerce solutions.

We blend strategy, creativity & technology combining to improve the way a website works for our clients' audience.

We have been building websites for 20 years. That is a long time for this media and, during that time, websites have changed dramatically. Not just in the build and functionality, but also in the way that the end user interacts with the website. By understanding how different browsers, viewing devices, competition, search engines, content management, security, etc can all affect the user experience, we can keep one step ahead of the competition. The result: - outstanding websites that work hard to attract relevant enquiries.

Whether you are looking for a good looking, hard working website to promote your services, sell your products or simply attract truly relevant enquiries, we can help. The following pages will provide an insight into some of our more recent work.

The image displays a responsive website for Prime Choice Marine Services across three devices: a desktop monitor, a tablet, and a smartphone. The website has a clean, modern design with a dark blue color scheme. The desktop view shows a large banner with the text "A NEW APPROACH TO VESSEL MANAGEMENT AND MAINTENANCE" over a background of a boat's deck. Below the banner is a detailed page for "MEMBERSHIP PACKAGES", listing four levels: Blue, Silver, Gold, and Black, each with a list of services like "Twice monthly visits", "Annual Engine commissioning", and "Service Party included". The tablet and smartphone views show the homepage with a "BECOME A MEMBER" button and a "PRIME CHOICE MARINE SERVICES" logo.

The image shows a desktop computer monitor and two smartphones displaying the Society for Underwater Technology (SUT) website. The desktop monitor displays the main homepage, which features a large image of a red and white research vessel sailing on the ocean under a blue sky. Below the image, text reads: "a multidisciplinary learned society bringing together organisations and individuals with an interest in underwater technology, ocean science and offshore engineering". The smartphone on the left displays the "Specialist Interest Groups" page, which lists various groups such as Diving and Hosted Submarines, Advances and Training, Environmental Purposes, Marine Renewable Energies, Ocean Resources, QMBO Offshore Site Investigation and Decommissioning, SUT - Policy Advisory, Design and Development, Subsea Engineering, Underwater Robotics Group, Underwater Sciences Group, and Young Professionals International. The smartphone on the right displays the "ABOUT THE SUT" page, which includes a brief description of the society's mission and a world map showing its global branches.

Flow Models

Evidence-based forecasting is an approach to forecasting, championed by Inpharmation, that involves building forecasts that are based on:

- Facts rather than opinions
- Validated techniques not untested approaches or guesses
- Simple, transparent techniques rather than unintelligible black boxes.

Our "manifesto" for evidence-based forecasting is contained in the book *Sales Forecasting for Pharmaceuticals: An Evidence-Based Approach* by Inpharmation's Managing Director, Gary Johnson.

A number of the world's leading pharma companies batch order this book to help instil an evidence-based approach to forecasting in their organizations.

"Europe's most respected pharma forecasting specialist consultancy."

Centre For Executive Leadership

What can evidence-based insights do for you?

For decades, Inpharmation has been driven to find the optimum sales forecasting models that are relevant for pharmaceutical sales forecasting. If you've ever questioned the validity of the sales forecasting approaches recommended to you by a consultancy then you'll understand why we developed a toolkit of validated forecast models for the pharmaceutical industry, delivering pricing solutions based upon models and methodologies that have been extensively validated for use in the pharmaceutical industry to gain market access.

One Great George Street

initial investors Touchstone Innovations and Norther Verdandi to develop the current technology for commercial applications. A further investment in 2013 by Jetstream Capital and Imperial Innovations has been used to scale up and commercialise the technology. Investment has continued into 2016 with the addition of Woodford Investment Management.

Econic Technologies moved its business operations to Alderley Park, Cheshire, in January 2017. This move will enable further scope for expansion and progression at all levels of the company.
